Mountain Weather Forecast

Bannau Brycheiniog (Brecon Beacons) National Park

Forecast valid from 06:00 on Sunday 11 Aug 2024 until 23:59 on Monday 12 Aug 2024

Forecast Issued on Sunday 11 Aug 2024 at 02:24

Confidence: High confidence for a fine and very warm day during daylight hours on Sunday, though low confidence in the risk of thundery showers after dark and on Monday. Confidence is higher for this to be followed by frontal systems and associated cloudier and wetter periods from Tuesday onwards, but low for the timings and details at this stage.

Headline for Sunday 11 Aug 2024: Early cloud clearing to a fine and very warm day with periods of sunshine.

Mountain weather hazards on Sunday 11 Aug 2024

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Low Likelihood
Thunderstorms Low Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** High Likelihood

Forecast for Sunday 11 Aug 2024

Weather: Patchy low cloud and valley fog clearing by mid-morning to leave a fine day with cloudy spells but also sunny periods, these perhaps most prolonged later in the day. A very small chance of isolated thundery showers after dark, but most likely after midnight. Feeling much warmer and more humid than on Saturday.

Chance of cloud-free hill tops above 600m: 60% becoming above 90% from midday.

Low cloud and visibility: Periods of cloud obscuring some hills and routes above 400m until midday, before lifting above summits. Away from any cloud, visibility will be good, though distant hills and landmarks will appear hazy, especially by the evening.

02:00 on Sun 11 Aug 2024	3mm	3.4mm	17.2mm

Forecast for Monday 12 Aug 2024

Weather: Some strong and gusty easterly winds through the early hours with an ongoing low risk of the odd thundery shower or flash of lightning. Isolated thunderstorms are possible through the day too, but a dry day is considered much more likely with cloudy skies at times during the morning, then mostly sunny through the afternoon. Feeling hot in the sunshine though still quite breezy, and likely fresher across westernmost hills.

Maximum wind: Southerly 20-30 mph with isolated gusts 40-45mph possible, mainly near any thunderstorms.

Chance of cloud-free hill tops 600m: 40% during the morning becoming 90% by the afternoon.

Low cloud and visibility: Periods of cloud above 500-600m developing during the morning, mainly in the west. This will give poor visibility at higher levels. Cloud clearing by the afternoon with visibility generally becoming good, though still fairly hazy at times.

Temperature: **Valleys:** Plus 16 Celsius rising to Plus 26 Celsius
At 600m: Plus 17 Celsius rising to Plus 22 Celsius.
Freezing level: Above the summits.
